UTAH VALLEY UNIVERSITY
Policies and Procedures

POLICY TITLE	Information Security	Policy Number	447
Section	Facilities, Operations, and Information Technology	Approval Date	
Subsection	Information Technology	Effective Date	
Responsible Office	Office of the Vice President of Digital Transformation	Last Review	

1.0 PURPOSE

1 **1.1** The purpose of this policy is to establish the Utah Valley University Information Security
2 Program in compliance with all applicable legal obligations. This program will ensure the
3 protection of university technology assets and information systems from unauthorized access or
4 damage; and maintain the confidentiality, integrity, and availability of technology assets and
5 information systems supporting the mission and functions of the University.

3.0 DEFINITIONS

- 25 **3.1 Account:** A login ID which, in combination with a password, PIN, or other authentication
26 token, is used to access a university information system or technology asset.
- 27 **3.2 Application:** An individual or standalone piece of software that is used to provide a specific
28 service to a community of users or is used as an interface to an information system.
- 29 **3.3 Audit log:** A chronological sequence of audit records, each of which contains evidence
30 directly pertaining to and resulting from the execution of a business process or system function.
- 31 **3.4 Change:** For purposes of this policy, an event or action that modifies the configuration of
32 any component, application, information system, or service.
- 33 **3.5 Confidential information:** Any information that is not generally available to the public and
34 that the University has identified as confidential, that should reasonably be understood to be
35 confidential, or that the University is obligated to keep confidential under applicable laws,
36 regulations, contractual obligations, university policies, or the policies of relevant government
37 agencies, including but not limited to PII, student records, financial information, research data,
38 and sensitive information.
- 39 **3.6 Control:** A means of managing risk, including policies, rules, procedures, processes,
40 practices, or organizational structures, which can be of administrative, technical, physical,
41 management, or legal nature.
- 42 **3.7 Crash:** A disruption of the supervisory or accounting functions of university technology
43 assets or doing anything that is likely to have that effect.
- 44 **3.8 Data Governance Council:** An executive committee with specific responsibilities within a
45 data domain or subdomain: data owners, data trustees, data stewards, data custodians, and data
46 technicians. (See Policy 445 *Institutional Data Governance and Management*.)

UTAH VALLEY UNIVERSITY Policies and Procedures

- 47 **3.9 Device owner:** For the purposes of this policy, any user, supervisor, IT technician, system
48 administrator, or other person who has administrative or operational control and is responsible
49 for the security, maintenance, operation, or purchase of a device.
- 50 **3.10 Disruptive activities:** Acts prohibited by Utah law that interfere with university or student
51 activities. (See Utah Code Ann. § 76-8-703 to 705.)
- 52 **3.11 Encryption:** The process by which information is altered using a code or mathematical
53 algorithm to be unintelligible to unauthorized readers.
- 54 **3.12 Firewall:** A network security device or program that monitors and controls network traffic
55 between networks or hosts with different security levels.
- 56 **3.13 Incident:** For the purposes of this policy, an incident is a confirmed or suspected security
57 breach (see section 3.25) or events or weaknesses that jeopardize the confidentiality, integrity,
58 and availability of the University's technology assets.
- 59 **3.14 Incident Response Team:** Directed by the Chief Information Security Officer (CISO) and
60 made up of campus personnel, the Incident Response Team is responsible for immediate
61 response to any breach of security. One or more members of the Incident Response Team must
62 be technically qualified to respond to information-related incidents. The Incident Response Team
63 is also responsible for determining and disseminating remedies and preventive measures that
64 develop as a result of responding to and resolving security breaches.
- 65 **3.15 Information asset:** Data or knowledge stored in any electronic manner and valued for
66 enabling the University to perform its business functions.
- 67 **3.16 Information system:** An application or group of servers or services used for the electronic
68 storage, processing, or transmitting of any university data or information assets.
- 69 **3.17 Information system media:** Physical media on which an information system's technology
70 assets are stored for backup and recovery purposes (e.g., backup tapes, backup disks, NAS/SAN
71 drives, magnetic media, cloud storage, etc.).
- 72 **3.18 Intellectual property:** Any intangible asset that consists of human knowledge and ideas
73 (e.g., patents, copyrights, trademarks, software, etc.).
- 74 **3.19 IT technicians:** Individuals who develop, administer, manage, and monitor the information
75 systems and technology assets that support the University's IT infrastructure. These individuals
76 are responsible for the security of the technology assets and information systems they manage.
77 IT technicians ensure that security-related activities are well documented and completed in a
78 consistent and auditable manner.

UTAH VALLEY UNIVERSITY Policies and Procedures

79 **3.20 Patch:** A fix to an application, failure, bug, or vulnerability. A patch may also be referred to
80 as a service pack.

81 **3.21 Personally identifiable information (PII):** Unique identifiers, including a person's Social
82 Security number, driver's license number, employee identification number, biometric identifiers,
83 personal financial information, passwords or other access codes, medical records, home or
84 personal telephone numbers, and personal email addresses.

85 **3.22 Private Sensitive Information (PSI):** A subset of PII that includes information such as
86 social security numbers, credit card information, health, and medical records or financial records,
87 that give specific information about an individual that is considered private or sensitive and can
88 lead to adverse consequences if disclosed, such as through identity theft, financial loss, or
89 invasion of privacy. Access to such data is governed by state and federal laws, both in terms of
90 protection of the data, and requirements for disclosing the data to the individual to whom it
91 pertains. It does not include "public information" as defined by GRAMA or directory
92 information as defined by FERPA.

93 **3.23 Risk:** The likelihood of a threat agent taking advantage of a vulnerability and the
94 corresponding business impact.

95 **3.24 Routine maintenance of the system:** Includes but is not limited to security checks,
96 deletion of temporary files, verification of email delivery, and confirmation of available disk
97 space.

98 **3.25 Security breach:** Includes but is not limited to unauthorized use of an account,
99 unauthorized access or unauthorized changes to system resources, use of bad passwords, or
100 attempted use or acquisition of others' passwords or other authentication methods.

101 **3.26 Security check:** Verification that privacy is ensured, and access is granted as needed and
102 appropriate.

103 **3.27 Server:** Hardware, software, and workstations used to provide information and services to
104 multiple users.

105 **3.28 System files:** Any files that control or otherwise affect the startup or operation of a
106 computer system.

107 **3.29 Technology asset:** Any data or information system which is a part of university business
108 processes including those used for electronic communication, including but not limited to
109 internet, email, and social media. Also includes any device that is used to conduct university
110 business regardless of ownership; connected to the University's network; used to create, access,
111 maintain, or transmit technology assets; or used for the processing, transmitting, or electronic
112 storage of any data or information. This includes but is not limited to servers, workstations,

UTAH VALLEY UNIVERSITY Policies and Procedures

113 mobile devices, medical devices, networking devices, and web cameras or other monitoring
114 devices.

115 **3.30 Unauthorized access:** Obtaining access into any technology asset, information system,
116 network, storage medium, system, program, file, data, user area, controlled physical area, or
117 other private repository without the permission of the steward or owner.

118 **3.31 User:** Any person who accesses any university technology asset, including students, staff,
119 faculty, permanent and temporary employees, contractors, vendors, research collaborators, and
120 third-party agents.

121 **3.32 Vulnerability:** A weakness that could be used to endanger or cause harm to an asset.

122 **3.33 Workstation:** A technology asset that performs as a general-purpose computer equipped
123 with a microprocessor and designed to run applications for an individual user (e.g., laptop,
124 desktop computer, PC, Mac, etc.).

4.0 POLICY

125 4.1 Scope of this Policy

126 **4.1.1** Compliance with this policy and all its related procedures is required for all university
127 administrative units, including colleges, divisions, departments, and centers, and all members of
128 the university community, including students, staff, faculty, other permanent or temporary
129 employees, contractors, research collaborators, vendors, and third-party agents. This policy
130 applies to anyone in the university community owning or overseeing the use of any type of
131 technology asset, including but not limited to

132 **4.1.1.1** supervisors of university entities or units, even in cases where vendor-owned or vendor-
133 managed equipment is housed in departments;

134 **4.1.1.2** faculty, staff, students, and other individuals who have technology assets connected to the
135 UVU network, even if those assets were acquired personally, i.e., not with university or grant
136 funds; and

137 **4.1.1.3** Digital Transformation (Dx) for the enterprise IT devices under ongoing support
138 contracts.

139 **4.1.2** If no one claims responsibility for a device, the supervisors of university entities or units
140 for the department in which the device resides shall be presumed to be responsible by default.

141 **4.1.3** This policy applies to individuals responsible (as defined above) for single-user devices
142 and to those responsible for multi-user devices.

UTAH VALLEY UNIVERSITY Policies and Procedures

- 143 **4.1.4** During routine audits, Internal Audit may verify user compliance with this policy and
144 security requirements.
- 145 **4.2 User Responsibilities**
- 146 **4.2.1** Use of technology assets must be legal, ethical, and consistent with the University's
147 mission.
- 148 **4.2.2** Instructional, administrative, and research uses of technology assets take priority over all
149 other uses.
- 150 **4.2.3** Individual users shall
- 151 **4.2.3.1** maintain the security and confidentiality of confidential information;
- 152 **4.2.3.2** exercise caution in the storage and disposal of files and data containing confidential
153 information assets;
- 154 **4.2.3.3** maintain safe passwords and other authentication methods, and not share or disclose
155 them;
- 156 **4.2.3.4** perform routine maintenance of the systems for which they are responsible, including
157 backup of all private, important, or irreplaceable files, and regularly performing file maintenance
158 (including scanning for viruses and sensitive data and deleting unnecessary files);
- 159 **4.2.3.5** ascertain and understand the laws, policies, rules, procedures, contracts, and licenses
160 applicable to their particular uses;
- 161 **4.2.3.6** comply with all federal, state, and other applicable laws, all generally applicable
162 university policies, guidelines, procedures, and best practices, and all applicable contracts and
163 licenses;
- 164 **4.2.3.7** use only those information systems and technology assets that they are authorized to use
165 and use them only in the manner and to the extent authorized;
- 166 **4.2.3.8** refrain from unauthorized attempts to circumvent the security mechanisms of any
167 university technology asset;
- 168 **4.2.3.9** refrain from attempts to degrade system performance or capabilities or damage
169 technology assets, information systems, software, or intellectual property of others;
- 170 **4.2.3.10** use multi-factor authentication required for all administrative and functional access to
171 technology assets that store, process, or transmit personally identifiable information; and

UTAH VALLEY UNIVERSITY Policies and Procedures

172 **4.2.3.11** immediately report any suspected or actual security breach to the University's
173 Cybersecurity and IT Risk Management Office (CITRM), the appropriate data steward, and data
174 custodian.

175 **4.2.4** Employees are required to follow Dx standards and controls for safeguarding electronically
176 stored PSI. The University and its employees should not use an individual's Social Security
177 Number (SSN) or Driver's License Number (DLN) as a personal identifier except as required by
178 law. Restricted information, including SSNs and DLNs, may be stored electronically only in
179 compliance with current Dx standards. If restricted information must be stored on paper, the files
180 must be stored securely with access provided only to authorized persons.

181
182 **4.2.5** All data users who have access to legally restricted or limited-access data shall formally
183 acknowledge (by signed statement or some other means) their understanding of the level of
184 access provided and their responsibility to maintain the confidentiality of data they access. Each
185 data user shall be responsible for the consequences of any misuse, including intentional
186 misrepresentation of institutional data. (See Policy 445 *Institutional Data Governance and*
187 *Management.*)

188 **4.3 User Prohibitions**

189 **4.3.1** Users shall not

190 **4.3.1.1** share individual credentials or security information;

191 **4.3.1.2** copy or change system files or applications without authorization from an authorized
192 system administrator;

193 **4.3.1.3** consume inordinate amounts of system resources (e.g., disk space, CPU time, email
194 system, printing facilities, and telephone lines), as determined by affected system administrators;

195 **4.3.1.4** crash machines or systems recklessly or deliberately;

196 **4.3.1.5** lock a public shared technology asset without authorization from a supervisor or asset
197 manager;

198 **4.3.1.6** use university technology assets for disruptive or illegal activities;

199 **4.3.1.7** violate licensing agreements, patent, copyright, or trademark laws or UVU Purchasing
200 regulations as governed by UVU Policy 241 *University Procurement*;

201 **4.3.1.8** reserve shared resources. A public shared computing facility device left unattended for
202 more than ten minutes is available for use, and any process running at the time of abandonment
203 shall be terminated. Running unattended programs or placing signs on devices to "reserve" them

204 during a user's absence is inappropriate without authorization from a system administrator or lab
205 assistant; or

206 **4.3.1.9** use weak passwords. Users are required to create strong passwords to protect against
207 security breaches. A strong password should be long, memorable to the user, and difficult for
208 others to guess. We recommend creating passwords using multiple unrelated words to form a
209 passphrase that is easy for you to remember but hard for others to crack. For example, combining
210 random and unrelated words like "BananaLampTreeEagle" is a strong option. Do not use the
211 following in your passwords:

- 212 • Personal Information: Avoid using information related to yourself, such as your phone
213 number, birth date, license plate number, spouse's name, or other identifiable details.
- 214 • Common Phrases: Do not use words like team mascots, seasons, or phrases from books,
215 poems, songs, movies, or famous speeches.

216 **4.3.2** Unless specifically approved by the Data Governance Council and registered with
217 University's Information Security Office (ISO) according to the procedures in this policy, anyone
218 given access to university data shall not electronically transmit or knowingly retain any PSI on
219 information systems or technology assets.

220 **4.4 System Administrator Rights and Responsibilities**

221 **4.4.1** System administrators must perform routine system maintenance and maintain a backup of
222 information. System administrators are not responsible for data lost due to system errors.

223 **4.4.2** Dx, including system administrators, shall work in partnership with data owners and data
224 stewards in fulfilling the responsibilities outlined in this policy.

225 **4.5 Intellectual Property Use**

226 **4.5.1** All users of intellectual property shall comply with UVU Policy 136 *Intellectual Property*,
227 including refraining from

228 **4.5.1.1** installing or distributing "pirated" or other applications that are not appropriately licensed
229 for use by the University; and

230 **4.5.1.2** violating the rights of any person or company protected by trade secret, patent, or any
231 other intellectual property laws or similar laws or regulations.

232 **4.6 Data Classification and Encryption**

233 **4.6.1** The University shall take measures to protect university technology assets that are created,
234 maintained, processed, or transmitted using information systems and information assets. These

UTAH VALLEY UNIVERSITY Policies and Procedures

235 measures shall be implemented commensurate with the assessed level of risk and reviewed at
236 regular intervals.

237 **4.6.2** IT technicians are primarily responsible for establishing, documenting, implementing, and
238 managing data handling and management procedures for the information systems and
239 information assets they support.

240 **4.6.3** All information assets shall be classified in accordance with the *Data Classification and*
241 *Encryption Guideline*, which can be found on the Digital Transformation policies website.

242 **4.6.4** All information assets shall have appropriate data handling procedures in accordance with
243 the data classification.

244 **4.6.5** All information assets shall have encryption requirements in accordance with the *Data*
245 *Classification and Encryption Guideline*, which can be found on the Dx policies website.

246 **4.7 Information Security Risk and Threat Management**

247 **4.7.1** The University's Information Security Risk Management Program shall support the
248 University's business missions while also mitigating financial, operational, reputational, and
249 regulatory compliance risk. Appropriate risk management enables the University to accomplish
250 its mission by

251 **4.7.1.1** securing information systems that create, maintain, process, or transmit the University's
252 information assets;

253 **4.7.1.2** enabling appropriate university personnel to make well-informed decisions regarding risk
254 and risk management;

255 **4.7.1.3** collaborating with other university risk management activities to ensure the University's
256 information security program priorities are aligned appropriately with the University's risk
257 tolerance;

258 **4.7.1.4** providing a systematic methodology to assess and manage information security risk for
259 the University; and

260 **4.7.1.5** reviewing contracts and terms of service to ensure that third parties entrusted with PII
261 will implement reasonable protections for that information in all stages of its lifecycle including
262 creation, storage, processing, recovery, transmittal, and destruction.

263 **4.7.2** Information systems and technology assets shall be protected commensurate with the
264 assessed level of risk, and security baseline settings shall be utilized to ensure these systems and
265 resources are guarded against malware and available for use. All IT technicians, Dx personnel,
266 and users managing university information systems and technology assets shall

UTAH VALLEY UNIVERSITY Policies and Procedures

267 **4.7.2.1** protect any information systems and technology assets under their management from
268 compromise;

269 **4.7.2.2** ensure the products and services provided continue to be delivered at acceptable levels
270 during a disruptive incident. Incidents may be caused by problems with technology assets, the
271 building, or external environment (such as weather);

272 **4.7.2.3** configure information systems and technology assets to reduce vulnerabilities to an
273 acceptable risk level;

274 **4.7.2.4** install anti-virus or other anti-malware tools, install relevant security patches, and
275 implement security best practices for technology assets;

276 **4.7.2.5** periodically verify audit and activity logs, examine performance data, and check for any
277 evidence of unauthorized access, viruses, or other malicious code; and

278 **4.7.2.6** cooperate with the Information Security Office by providing support for and review of
279 administrative activities as well as performing more sophisticated procedures such as penetration
280 testing (also called pen testing or ethical hacking) to test a computer system, network, or web
281 application to find security vulnerabilities that an attacker could exploit along with real-time
282 intrusion detection.

283 **4.8 Access Management**

284 **4.8.1** Only authorized users shall have physical, electronic, or other access to information
285 systems and technology assets. Access shall be limited to users with a business need to know and
286 limited only to the requirements of their job function. It is the shared responsibility of IT
287 technicians, data stewards, and users to prevent unauthorized access to these assets. Access
288 controls shall include prevention and detection of unauthorized use, and effective procedures for
289 granting authorization, tools, and practices to authenticate authorized users.

290 **4.8.2** The appropriate university system administration group shall

291 **4.8.2.1** issue university accounts after the request is authorized appropriately and documented
292 adequately;

293 **4.8.2.2** authenticate university accounts at a minimum via unique login and complex passwords;

294 **4.8.2.3** deactivate, disable, or delete university accounts—except where maintaining such
295 accounts is a business necessity—as soon as reasonably possible after receiving authorized
296 notification of termination of contract, employment, or relationship with the University; and

297 **4.8.2.4** conduct periodic reviews of authorized access commensurate with the assessed level of
298 risk.

299 **4.9 Change Management**

300 **4.9.1** Prior to implementation, Dx shall authorize, test, document, and approve any changes to
301 university production information systems and technology assets that store, process, transmit, or
302 maintain confidential data. Dx will notify the affected entities.

303 **4.10 Physical and Facility Security**

304 **4.10.1** University technology assets and information systems shall be physically protected
305 commensurate with the assessed level of risk. IT technicians and personnel shall ensure that
306 controls are planned and implemented for safeguarding physical components against
307 compromise and environmental hazards. Locks, cameras, alarms, redundant power systems, fire
308 detection and suppression systems, and other safeguards as appropriate shall be installed in data
309 centers and technology closets to ensure protection from natural and facility threats and to
310 discourage and respond to unauthorized access to electronic or physical components contained in
311 these areas.

312 **4.10.2** The University shall maintain an inventory of all internal or third-party technology assets
313 that store, process, or transmit personally identifiable information.

314 **4.11 Remote Access**

315 **4.11.1** Users with remote access privileges to any of the University's networks inside a firewall
316 must connect through an approved connection method such as a secure VPN.

317 **4.11.2** Users with remote access privileges to the University's technology assets must ensure that
318 all devices being used are given the same security considerations as outlined in the IT security
319 annual training. Specific security questions should be directed to the Cybersecurity and IT Risk
320 Management Office (CITRM).

321 **4.12 Network Security**

322 **4.12.1** Access to both internal and external networked services shall be controlled and protected
323 commensurate with the assessed level of risk. User, information system, and technology asset
324 access to networks and network services shall not compromise the security of the network
325 services. Dx ensures

326 **4.12.1.1** appropriate controls are in place between the University's network, networks owned by
327 other organizations, and public networks; and

328 **4.12.1.2** appropriate authentication mechanisms are applied for users, information systems, and
329 technology assets.

330 **4.13 Log Management and Monitoring**

331 **4.13.1** The appropriate Dx personnel, in coordination with the CISO, shall configure university
332 information systems and technology assets to record and monitor information security incidents,
333 events and weaknesses. They shall regularly review and analyze audit logs for indications of
334 inappropriate or unusual activity.

335 **4.14 Information System Media Handling**

336 **4.14.1** The University shall inventory, control, and physically protect information system media
337 commensurate with the assessed level of risk and the *Data Classification and Encryption*
338 *Guideline* to prevent interruption to business activities or unauthorized disclosure, modification,
339 removal, or destruction of technology assets. The University shall establish appropriate operating
340 procedures to protect information system media, input/output data, and system documentation
341 from unauthorized disclosure, modification, removal, and destruction.

342 **4.14.2** The appropriate university system administration or security group shall restrict access to
343 information system media to authorized individuals.

344 **4.14.3** All institutionally owned computing devices, including removable storage devices, shall
345 have industry standard encryption that renders the storage media of those devices reasonably
346 unrecoverable by a third party; when this is not feasible, the University shall implement other
347 reasonable controls.

348 **4.14.4** The University shall physically control and securely store information system media on-
349 site within controlled areas where appropriate and ensure any authorized off-site storage is, at
350 minimum, secured at the same level as the on-site area.

351 **4.14.5** The University shall protect and control information system media during transport
352 outside of controlled areas and shall restrict the activities associated with transport of this media
353 to authorized personnel.

354 **4.14.6** Appropriate university personnel shall sanitize or destroy information system media
355 containing confidential data prior to disposal or release for reuse in accordance with National
356 Institute of Standards and Technology guidance.

357 **4.15 Future Technology Needs Assessment**

358 **4.15.1** Dx shall ensure the availability, performance, and capacity requirements for current and
359 future needs are met with cost-effective service provision. This includes assessment of current
360 capabilities, future needs based on organization requirements, and implementation of actions to
361 meet the new requirements. Through effective capacity planning, Dx will ensure service
362 availability, efficient management of resources, and optimization of system performance.

363 **4.16 Information Security Awareness and Training**

UTAH VALLEY UNIVERSITY Policies and Procedures

364 **4.16.1** All university employees and other affiliates are required to complete appropriate security
365 training relevant to their roles and responsibilities before gaining access to systems, records, and
366 information resources and shall renew that training annually. If university employees and other
367 affiliates do not fulfill these training requirements, their access may be subject to revocation.

368 **4.16.2** The appropriate university information systems and security groups shall stay up to date
369 with the latest recommended security practices, techniques, and technologies, and the latest
370 security-related information including threats, vulnerabilities, and incidents.

371 **4.17 Internal Audit Assessment**

372 **4.17.1** Internal Audit may audit information systems and technology assets to assess compliance
373 with this policy.

374 **4.18 Violations**

375 **4.18.1** Incidents of actual or suspected non-compliance with this policy or associated regulations
376 must be reported to the Cybersecurity and IT Risk Management Office (CITRM), whose
377 administrators will work with the appropriate authorities to resolve the issue.

378 **4.18.2** The University reserves the right to revoke access to any information system or
379 technology asset for any user who violates this policy or associated regulations or for any other
380 business reasons in accordance with applicable policies. Violations of this policy or associated
381 regulations may result in other disciplinary action in accordance with pertinent university
382 policies.

383 **4.19 Security Standards**

384 **4.19.1** Those responsible for devices connected to the UVU network must ensure that key
385 security vulnerabilities are eliminated from these devices.

386 **4.19.2** Dx shall maintain and communicate to device owners a current list of key vulnerabilities
387 and steps required to mitigate the vulnerabilities. Device owners are responsible for addressing
388 those vulnerabilities promptly with Dx assistance as needed.

389 **4.20 Enforcement**

390 **4.20.1** In cases where information systems and technology assets are threatened by improperly
391 maintained computing devices, Dx may eliminate the threat, working with the relevant device
392 owner where possible. This may include denial of access.

393 **4.21 Exceptions to Policy**

394 **4.21.1** Exceptions to this policy must be justified, approved, and reviewed annually as outlined
395 in the procedures. Requests for exceptions to this policy shall be made in writing to the Chief
396 Information Officer. Exception may be granted if the benefits to the University far outweigh the
397 risks of the vulnerable device, as judged by the Chief Information Officer.

398 **4.22 Review and Maintenance of Policy**

399 **4.22.1** Dx Executive Leadership, including the Chief Information Officer, shall review this
400 policy at least annually and evaluate changes in law and technology that may impact the
401 University. The committee shall invite representatives of UVUSA, PACE, General Counsel, and
402 Faculty Senate to participate.

5.0 PROCEDURES

403 **5.1 Physical Security of Enterprise Hardware**

404 **5.1.1** Any department that assumes responsibility for administrative data must ensure that the
405 computing systems housing the data are physically secure. Areas to address include the
406 following:

407 **5.1.1.1** The equipment shall be protected from excessive heat, cold, humidity, and dryness.
408 Alarms shall exist to warn of thresholds being exceeded;

409 **5.1.1.2** The equipment shall be protected against electrical interruptions, voltage spikes, and
410 surges; and

411 **5.1.1.3** The equipment shall be protected with smoke detectors, fire extinguishers, and air-tight
412 computer rooms for containment of fire suppression gas, air filters, and water sensors. Alarms
413 tied to the University and city police departments shall be installed;

414 **5.1.1.4** The equipment shall be properly locked up with no vulnerabilities from drop ceilings,
415 raised floors, or ventilation ducts. A log of accesses by personnel shall be kept; and

416 **5.1.1.5** All backups shall, whether stored onsite or offsite, be securely maintained and managed
417 in a manner appropriate for the storage of university data;

418 **5.1.1.6** The history of theft and vandalism in the buildings of the immediate vicinity shall be
419 considered, and appropriate measures shall be taken to counteract the risks; and

420 **5.1.1.7** A disaster recovery plan shall exist, and drills shall be conducted on a regular basis.
421 Offsite documentation shall exist, and key personnel shall be cross trained to handle an
422 emergency.

UTAH VALLEY UNIVERSITY Policies and Procedures

423 **5.1.2** Device owners shall install and run campus approved anti-virus software on these devices
424 and apply updates from the software vendor as they become available.

425 **5.1.3** Devices owners shall apply security-related updates to the operating system running on
426 their devices as these updates become available from operating system vendors.

427 **5.1.4** Device owners shall switch off unneeded services or use a firewall to eliminate the risk of
428 these being exploited.

429 **5.2 Incident Management**

430 **5.2.1** All suspected or actual security breaches of university or departmental systems must be
431 reported immediately to the University's Chief Information Security Officer (CISO). (Reports
432 may be emailed to SECURITY@UVU.EDU.) The incident must also be reported to the
433 appropriate data steward and data custodian.

434 **5.2.2** If the compromised system contains PII or PSI as outlined in UVU Policy 445 *Institutional*
435 *Data Management and Access*, Dx personnel or the appropriate data owner must report the
436 incident to the CISO. Additional technical, forensic, and other support may be sought from
437 outside the campus community.

438 **5.2.3** If PII, PSI, secured data, or any other information that must be safeguarded against
439 unauthorized access has been accessed or compromised by unauthorized persons or
440 organizations, IT personnel or the appropriate data owner must report the incident immediately
441 to the CISO (SECURITY@UVU.EDU) and cooperate with their dean, department head, or
442 supervisor; the Incident Response Team; their respective vice president; and the Office of
443 General Counsel to assess the level of threat or liability posed to the University and to those
444 whose PSI was accessed. In accordance with applicable laws, the University shall notify the
445 individuals whose PSI was accessed or compromised, providing them with instructions regarding
446 measures to be taken to protect themselves from identity theft.

447 **5.3 Security Management of PSI**

448 **5.3.1** PII, PSI, secured data, and any other information that must be safeguarded against
449 unauthorized access should be identified and protected. Anyone with access to data resources
450 who is uncertain whether or not it contains PSI or secured data must seek direction from the Data
451 Governance Council, the appropriate data steward or data custodian, the campus HIPAA Privacy
452 Officer, or the University's Chief Information Security Officer (CISO).

453 **5.3.2** Any individual who stores export-controlled patentable research shall have and follow a
454 CISO-approved security plan.

UTAH VALLEY UNIVERSITY
Policies and Procedures

455 **5.3.3** The CISO must approve security procedures for technology assets, which includes any
456 devices, systems, or applications that do not necessarily store, process, or transmit PSI, if access
457 to such resources may cause a breach of security.

458 **5.3.4** Individuals are responsible for ensuring that all electronic information, hard copy
459 information, and hardware devices in their possession are physically protected in accordance
460 with the record classification level as either private or protected data. For more information,
461 (refer to UVU Policy 133 *Compliance with Government Records Access and Management Act*
462 and the *University Data Classification and Encryption Guidelines* on the Dx policy website).

463 **5.4 Operational Control Activities**

464 **5.4.1** Authorized Dx personnel shall perform the following processes regularly as operational
465 control activities to ensure proper access and functioning of information systems and technology
466 assets:

467 **5.4.1.1** Assess availability, performance, and capacity of services and resources to ensure that
468 cost-effective capacity and performance are available.

469 **5.4.1.2** Identify important services to the organization, map services and resources to
470 organization processes, and identify key organization dependencies.

471 **5.4.1.3** Plan and prioritize availability, performance, and capacity implications of changing
472 organization needs and service requirements.

473 **5.4.1.4** Continually monitor, measure, analyze, and review availability, performance, and
474 capacity.

475 **5.4.1.5** Investigate and address availability, performance, and capacity issues through monitoring
476 and investigating.

Section	Facilities, Operations, and Information Technology	Approval Date	
Subsection	Information Technology	Effective Date	
Responsible Office	Office of the Vice President of Digital Transformation		

1.0 PURPOSE

478 **1.2** The purpose of this policy is to establish the Utah Valley University Information Security
 479 Program in compliance with all applicable legal obligations. This program will ensure the
 480 protection of university technology assets, information systems, and electronic and digital
 481 resources from unauthorized access or damage; and maintain the confidentiality, integrity, and
 482 availability of technology assets and information systems supporting the mission and functions
 483 of the University.

3.0 DEFINITIONS

- 504 ~~3.34 Account: A login ID which, in combination with a password, PIN, or other authentication~~
505 ~~token, is used to access a university information system, digital or electronic resources.~~
- 506 ~~3.35 Application: An individual or standalone piece of software that is used to provide a~~
507 ~~specific service to a community of users or is used as an interface to an information system.~~
- 508 ~~3.36 Asset: Any university owned information, asset, digital or electronic resources that is a part~~
509 ~~of university business processes.~~
- 510 ~~3.37 Audit log: A chronological sequence of audit records, each of which contains evidence~~
511 ~~directly pertaining to and resulting from the execution of a business process or system function.~~
- 512 ~~3.38 Change: For purposes of this policy, an event or action which modifies the configuration of~~
513 ~~any component, application, information system, or service.~~
- 514 ~~3.39 Confidential information: Any information that is not generally available to the public~~
515 ~~and that university has identified as confidential, that should reasonably be understood to be~~
516 ~~confidential, or that university is obligated to keep confidential under applicable laws,~~
517 ~~regulations, contractual obligations, university policies, or the policies of relevant government~~
518 ~~agencies, including but not limited to PII, student records, financial information, research data,~~
519 ~~and sensitive information.~~
- 520 ~~3.40 Control: A means of managing risk, including policies, rules, procedures, processes,~~
521 ~~practices, or organizational structures, which can be of administrative, technical, physical,~~
522 ~~management, or legal nature. Control is also used as a synonym for safeguard or~~
523 ~~countermeasure.~~

UTAH VALLEY UNIVERSITY Policies and Procedures

- 524 ~~3.41 Crash: A disruption of the supervisory or accounting functions of the computing facilities~~
525 ~~or doing anything which is likely to have that effect.~~
- 526 ~~3.42 Digital resource: Any device that is owned by the University or used to conduct university~~
527 ~~business regardless of ownership; connected to the University's network; used to create, access,~~
528 ~~maintain, or transmit technology assets; or used for the processing, transmitting, or electronic~~
529 ~~storage of any data or information. This includes but is not limited to servers, workstations,~~
530 ~~mobile devices, medical devices, networking devices, and web cameras or other monitoring~~
531 ~~devices.~~
- 532 ~~3.43~~
- 533 ~~3.44 Disruptive activities: Acts prohibited by Utah law that interfere with university or student~~
534 ~~activities. (See Utah Code Ann. § 76-8-703 to 705.)~~
- 535 ~~3.45 Electronic resource: Any resource used for electronic communication, including but not~~
536 ~~limited to internet, email, and social media.~~
- 537 ~~3.46 Encryption: The process by which information is altered using a code or mathematical~~
538 ~~algorithm to be unintelligible to unauthorized readers.~~
- 539 ~~3.47 Firewall: A device or program that controls network traffic flow between networks or hosts~~
540 ~~that employ disparate security policies.~~
- 541 ~~3.48 Incident: A confirmed or suspected security breach.~~
- 542 ~~3.49 Incident Response Team: Directed by the Chief CISO) and made up of campus personnel,~~
543 ~~the Incident Response Team is responsible for immediate response to any breach of security.~~
544 ~~One or more members of the Incident Response Team must be technically qualified to respond to~~
545 ~~information related incidents. The Incident Response Team is also responsible for determining~~
546 ~~and disseminating remedies and preventive measures that develop as a result of responding to~~
547 ~~and resolving security breaches.~~
- 548 ~~3.50 Information asset: Data or knowledge stored in any electronic manner and recognized as~~
549 ~~having value for the purpose of enabling the University to perform its business functions.~~
- 550 ~~3.51 Information security incidents: Events or weaknesses that jeopardize the confidentiality,~~
551 ~~integrity, and availability of the University's technology assets, digital or electronic resources,~~
552 ~~and information systems.~~
- 553 ~~3.52 Information system: An application or group of servers used for the electronic storage,~~
554 ~~processing, or transmitting of any university data or information asset.~~

UTAH VALLEY UNIVERSITY Policies and Procedures

555 **3.53 Information system media:** Physical media on which an information system's technology
556 assets are stored for backup and recovery purposes (e.g., backup tapes, backup disks, NAS/SAN
557 drives, magnetic media, etc.).

558 **3.54 Intellectual property:** Any intangible asset that consists of human knowledge and ideas
559 (e.g., patents, copyrights, trademarks, software, etc.).

560 **3.55 IT technicians:** Individuals who develop, administer, manage, and monitor the information
561 systems, and digital or electronic resources that support the University's IT infrastructure. These
562 individuals are responsible for the security of the IT resources, information systems, and
563 electronic resources they manage, and IT technicians assure that security-related activities are
564 well documented and completed in a consistent and auditable manner.

565 **3.56 Patch:** A fix to a program failure, bug, or vulnerability. A patch may also be referred to as a
566 Service Pack.

567 **3.57 Personally identifiable information (PII):** Unique identifiers, including a person's Social
568 Security number, driver's license number, employee identification number, biometric identifiers,
569 personal financial information, passwords or other access codes, medical records, home or
570 personal telephone numbers, and personal email addresses.

571 **3.58 Private Sensitive Information (PSI):** Social security numbers, credit card information,
572 health, and medical records, financial records, that give specific information about an individual
573 that is considered private or sensitive and can lead to adverse consequences if disclosed, such as
574 identity theft, financial loss, or invasion of privacy. Access to such data is governed by state and
575 federal laws, both in terms of protection of the data, and requirements for disclosing the data to
576 the individual to whom it pertains. It does not include "public information" as defined by
577 GRAMA or directory information as defined by FERPA.

578 **3.59 Risk:** The likelihood of a threat agent taking advantage of a vulnerability and the
579 corresponding business impact. Risk is usually calculated as either a quantitative or qualitative
580 score and can be represented in the following equation: Risk = (likelihood of threat/vulnerability
581 event occurrence) X (business impact of event occurring).

582 **3.60 Routine maintenance of the system:** Includes but is not limited to security checks,
583 deletion of temporary files, verification of email delivery, and assurance of available disk space.

584 **3.61 Security breach:** Includes but is not limited to unauthorized use of an account,
585 unauthorized access or unauthorized changes to system resources, use of bad passwords, or
586 attempted use or acquisition of others' passwords.

587 **3.62 Security check:** Verification that privacy is ensured and access is granted as needed and
588 appropriate.

UTAH VALLEY UNIVERSITY

Policies and Procedures

589 ~~3.63 Server:~~ Hardware, software, and workstations used to provide information and services to
590 multiple users.

591 ~~3.64 System files:~~ Any files that control or otherwise affect the startup or operation of a
592 computer system.

593 ~~3.65 Unauthorized access:~~ Obtaining access into any digital or electronic resource, network,
594 storage medium, system, program, file, user area, controlled physical area, or other private
595 repository without the permission of the steward or owner.

596 ~~3.66 User:~~ Any person who accesses any university information systems and digital and
597 electronic resources, including students, staff, faculty, permanent and temporary employees,
598 contractors, vendors, research collaborators, and third party agents.

599 ~~3.67 Vulnerability:~~ A weakness that could be used to endanger or cause harm to an asset.

600 ~~3.68 Workstation:~~ An electronic computing device, terminal, or any other device that performs
601 as a general purpose computer equipped with a microprocessor and designed to run commercial
602 software (such as a word processing application or internet browser) for an individual user (e.g.,
603 laptop, desktop computer, PC, Mac, etc.).

604

4.0 POLICY

605

606 4.23 Scope of this Policy

607 ~~4.23.1~~ Compliance with this policy and all its related procedures is required for all university
608 administrative units, including colleges, divisions, departments, and centers and all members of
609 the university community, including students, staff, faculty, other permanent or temporary
610 employees, contractors, research collaborators, vendors, and third party agents. This policy
611 applies to anyone in the university community owning or overseeing the use of any type of
612 computing device connected to the UVU network, including but not limited to:

613 ~~4.23.1.1~~ UVU department heads, even in cases where vendor owned or vendor managed
614 equipment is housed in departments; and

615 ~~4.23.1.2~~ Faculty, staff, students, and other individuals who have devices connected to the UVU
616 network, even if those devices were acquired personally, i.e., not with university or grant funds;
617 and

618 ~~4.23.1.3~~ Digital Transformation (Dx) for the enterprise IT devices under ongoing support
619 contracts.

UTAH VALLEY UNIVERSITY

Policies and Procedures

620 ~~4.23.2 If no one claims responsibility for a device, the UVU department head for the department~~
621 ~~in which the device resides shall be presumed to be responsible by default.~~

622 ~~4.23.3 This policy applies to individuals responsible (as defined above) for devices that serve~~
623 ~~more than one user and to those responsible for single-user devices.~~

624 ~~4.23.4 When devices are used for university business, compliance shall be verified by Internal~~
625 ~~Audit during routine audits.~~

626 **4.24 User Responsibilities**

627 ~~4.24.1 Use of the UVU technology assets must be legal, ethical, and consistent with the~~
628 ~~University's mission. User violations of this policy may reflect negatively on the University.~~

629 ~~4.24.2 Instructional, administrative, and research uses of system resources take priority over all~~
630 ~~other uses.~~

631 ~~4.24.3 Individual users shall do the following:~~

632 ~~4.24.3.1 Maintain the security and confidentiality of confidential information assets; and~~

633 ~~4.24.3.2 Exercise caution in the storage and disposal of files containing confidential information~~
634 ~~assets; and~~

635 ~~4.24.3.3 Choose safe passwords, change them often, and do not disclose them; and~~

636 ~~4.24.3.4 Backup all private, important, or irreplaceable files, and regularly perform personal file~~
637 ~~maintenance (including scanning for viruses and sensitive data and deleting unnecessary files);~~
638 ~~and~~

639 ~~4.24.3.5 Ascertain and understand the laws, policies, rules, procedures, contracts, and licenses~~
640 ~~applicable to their particular uses; and~~

641 ~~4.24.3.6 Comply with all federal, state, and other applicable laws, all generally applicable~~
642 ~~university regulations, and all applicable contracts and licenses; and~~

643 ~~4.24.3.7 Use only those university information systems and digital and electronic resources that~~
644 ~~they are authorized to use and use them only in the manner and to the extent authorized; and~~

645 ~~4.24.3.8 Refrain from unauthorized attempts to circumvent the security mechanisms of any~~
646 ~~university digital or electronic resource; and~~

647 ~~4.24.3.9 Refrain from attempts to degrade system performance or capabilities or damage digital~~
648 ~~or electronic resources information systems, software, or intellectual property of others; and~~

UTAH VALLEY UNIVERSITY

Policies and Procedures

649 ~~4.24.3.10 Use multi-factor authentication required for all administrative and functional access to~~
650 ~~digital or electronic resources that store, process, or transmit personally identifiable information.~~

651 ~~4.24.3.11 Immediately report any suspected or actual security breach to the University's~~
652 ~~Information Security Office (ISO), the appropriate data steward, and data custodian.~~

653 ~~4.24.4 Employees are required to follow current IT standards and controls for safeguarding~~
654 ~~against electronically stored PSI. UVU should not use an individual's Social Security Number~~
655 ~~(SSN) or Driver's License Number (DLN) as a personal identifier except as required by law.~~
656 ~~Restricted information, including SSNs and DLNs, may be stored electronically only in~~
657 ~~compliance with current IT standards. If restricted information must be stored on paper, the files~~
658 ~~must be stored securely with access provided only to authorized persons.~~

659
660 ~~4.24.5 All data users having access to legally restricted or limited access data shall formally~~
661 ~~acknowledge (by signed statement or some other means) their understanding of the level of~~
662 ~~access provided and their responsibility to maintain the confidentiality of data they access. Each~~
663 ~~data user shall be responsible for the consequences of any misuse, including intentional~~
664 ~~misrepresentation of institutional data.~~

665 ~~4.25 User Prohibitions~~

666 ~~4.25.1 Users shall not do the following:~~

667 ~~4.25.1.1 Share passwords or accounts; or~~

668 ~~4.25.1.2 Copy or change system files or software without authorization from a system~~
669 ~~administrator; or~~

670 ~~4.25.1.3 Consume inordinate amounts of system resources (e.g., disk space, CPU time, email~~
671 ~~system, printing facilities, and dial-up access lines), as determined by affected system~~
672 ~~administrators; or~~

673 ~~4.25.1.4 Crash machines or systems recklessly or deliberately; or~~

674 ~~4.25.1.5 Lock a public shared technology asset without authorization from a supervisor or asset~~
675 ~~manager; or~~

676 ~~4.25.1.6 Use the university technology assets for disruptive or illegal activities; or~~

677 ~~4.25.1.7 Violate licensing agreements; patent, copyright, or trademark laws; or UVU Purchasing~~
678 ~~regulations as governed by UVU Policy 241 *University Procurement*; or~~

679 ~~4.25.1.8 Reserve shared resources. A public shared computing facility device left unattended for~~
680 ~~more than ten minutes is available for use, and any process running at the time of abandonment~~

UTAH VALLEY UNIVERSITY

Policies and Procedures

681 shall be terminated. Running unattended programs or placing signs on devices to “reserve” them
682 during a user’s absence is inappropriate without authorization from a system administrator or lab
683 assistant; or

684 ~~4.25.1.9~~ Use weak passwords. Users shall not use easily guessable passwords. Weak passwords
685 can create security breaches, and failure to change a weak password when directed by a system
686 administrator to do so will result in a locked account. Examples of weak passwords include

687 ● Information related to the user (such as phone number, birth date, license plate number,
688 spouse name, etc.); or

689 ● Dictionary words in any language, or phrases from books, films, poems, songs (song lyrics),
690 famous speeches, etc.; or

691 ● Words with simple algorithms applied, such as using the same word backwards,
692 concatenating two words, or concatenating two words with a punctuation character in
693 between (e.g., Elponitnatsnoc, yenoh, eipragus, yellowtiger, regitwolley, cat?dog,
694 star!search).

695 ~~4.25.2~~ Unless specifically approved by the Data Governance Council and registered with
696 University's Information Security Office (ISO) according to the procedures below, anyone given
697 access to university data shall not electronically transmit or knowingly retain on personal
698 computers, servers, or computing or storage devices any PSI.

699 ~~4.26 System Administrator Rights and Responsibilities~~

700 ~~4.26.1~~ System administrators must perform routine maintenance of the system and keep a backup
701 of information. System administrators are not responsible for data lost due to system errors.

702 ~~4.26.2~~ Dx, including system administrators, shall work in partnership with data owners and data
703 stewards in fulfilling the responsibilities outlined in this policy.

704 ~~4.27 Intellectual Property Use~~

705 ~~4.27.1~~ All users of intellectual property shall comply with UVU Policy 136 *Intellectual*
706 *Property*, including refraining from

707 ~~4.27.1.1~~ Installing or distributing "pirated" or other software products that are not appropriately
708 licensed for use by the University; and

709 ~~4.27.1.2~~ Violating the rights of any person or company protected by trade secret, patent, or any
710 other intellectual property laws or similar laws or regulations.

711 ~~4.28 Data Classification and Encryption~~

UTAH VALLEY UNIVERSITY

Policies and Procedures

712 ~~4.28.1~~ The University shall take measures to protect university technology assets that are
713 created, maintained, processed, or transmitted using information systems and digital or electronic
714 resources. These measures shall be implemented commensurate with the assessed level of risk
715 and reviewed at regular intervals.

716 ~~4.28.2~~ IT technicians are primarily responsible for establishing, documenting, implementing, and
717 managing data handling and management procedures for the information and digital or electronic
718 resources systems they support.

719 ~~4.28.3~~ All technology assets shall be classified in accordance with the *Data Classification and*
720 *Encryption Guideline*, which can be found on the Office of Information Technology IT policies
721 website.

722 ~~4.28.4~~ All technology assets shall have appropriate data handling procedures in accordance with
723 the data classification.

724 ~~4.28.5~~ All technology assets shall have encryption requirements in accordance with the *Data*
725 *Classification and Encryption Guideline*, which can be found on the Office of Information
726 Technology IT policies website.

727 ~~4.29 Information Security Risk and Threat Management~~

728 ~~4.29.1~~ The University's Information Security Risk Management Program shall support the
729 University's business missions while also mitigating financial, operational, reputational, and
730 regulatory compliance risk. Appropriate risk management enables the University to accomplish
731 its mission by doing the following:

732 ~~4.29.1.1~~ Securing the information systems that create, maintain, process, or transmit the
733 University's technology assets; and

734 ~~4.29.1.2~~ Enabling the appropriate university personnel to make well informed decisions
735 regarding risk and risk management; and

736 ~~4.29.1.3~~ Collaborating with other university risk management activities to ensure the University's
737 information security program priorities are aligned appropriately with the University's risk
738 tolerance; and

739 ~~4.29.1.4~~ Providing a systematic methodology to assess and manage information security risk for
740 the University; and

741 ~~4.29.1.5~~ Reviewing contracts and terms of service to ensure that third parties entrusted with
742 personally identifiable information will implement reasonable protections for that information in
743 all stages of its lifecycle including creation, storage, processing, recovery, transmittal, and
744 destruction.

UTAH VALLEY UNIVERSITY

Policies and Procedures

745 ~~4.29.2 Information systems and digital or electronic resources shall be protected commensurate~~
746 ~~with the assessed level of risk, and security baseline settings shall be utilized to ensure these~~
747 ~~systems and resources are guarded against malware and available for use. All IT technicians, IT~~
748 ~~personnel, and users managing university information systems and digital or electronic resources~~
749 ~~shall do the following:~~

750 ~~4.29.2.1 Protect any information systems and digital or electronic resources under their~~
751 ~~management from compromise; and~~

752 ~~4.29.2.2 Ensure the products and services provided continue to be delivered at acceptable levels~~
753 ~~during a disruptive incident. Incidents may be caused by problems with IT, telephones, the~~
754 ~~building, or external environment (such as weather); and~~

755 ~~4.29.2.3 Configure information systems and digital or electronic resources to reduce~~
756 ~~vulnerabilities to an acceptable risk level; and~~

757 ~~4.29.2.4 Install anti-virus or other anti-malware tools, install relevant security patches, and~~
758 ~~implement security best practices for digital or electronic resources; and~~

759 ~~4.29.2.5 Periodically verify audit and activity logs, examine performance data, and check for any~~
760 ~~evidence of unauthorized access, viruses, or other malicious code; and~~

761 ~~4.29.2.6 Cooperate with the Information Security Office by providing support for and review of~~
762 ~~administrative activities as well as performing more sophisticated procedures such as penetration~~
763 ~~testing (also called pen testing or ethical hacking) to test a computer system, network, or web~~
764 ~~application to find security vulnerabilities that an attacker could exploit along with real-time~~
765 ~~intrusion detection.~~

766 ~~4.30 Access Management~~

767 ~~4.30.1 Only authorized users shall have physical, electronic, or other access to information~~
768 ~~systems, technology assets, and digital or electronic resources. Access shall be limited to users~~
769 ~~with a business need to know and limited only to the requirements of their job function. It is the~~
770 ~~shared responsibility of IT technicians and users to prevent unauthorized access to these~~
771 ~~resources. Access controls shall include prevention and detection of unauthorized use, and~~
772 ~~effective procedures for granting authorization, tools, and practices to authenticate authorized~~
773 ~~users.~~

774 ~~4.30.2 The appropriate university system administration group shall issue university accounts~~
775 ~~after the request is authorized appropriately and documented adequately.~~

776 ~~4.30.3 The appropriate university system administration group shall authenticate university~~
777 ~~accounts at a minimum via unique login and complex passwords.~~

UTAH VALLEY UNIVERSITY

Policies and Procedures

778 ~~4.30.4 The appropriate university system administration group shall deactivate, disable, or delete~~
779 ~~university accounts—except where maintaining such accounts is a business necessity—as soon~~
780 ~~as reasonably possible after receiving authorized notification of termination of contract,~~
781 ~~employment, or relationship with the University.~~

782 ~~4.30.5 The appropriate university security group shall conduct periodic reviews of authorized~~
783 ~~access commensurate with the assessed level of risk.~~

784 ~~4.31 Change Management~~

785 ~~4.31.1 Any changes to university production information systems and digital or electronic~~
786 ~~resources that store, process, transmit, or maintain confidential data shall be authorized, tested,~~
787 ~~documented, and approved prior to implementation. Digital Transformation will notify the~~
788 ~~affected entities.~~

789 ~~4.32 Physical and Facility Security~~

790 ~~4.32.1 University IT resources and information systems shall be physically protected~~
791 ~~commensurate with the assessed level of risk. IT technicians and personnel shall ensure that~~
792 ~~controls are planned and implemented for safeguarding physical components against~~
793 ~~compromise and environmental hazards. Locks, cameras, alarms, redundant power systems, fire~~
794 ~~detection and suppression systems, and other safeguards as appropriate shall be installed in data~~
795 ~~centers and technology closets to ensure protection from natural and facility threats and to~~
796 ~~discourage and respond to unauthorized access to electronic or physical components contained in~~
797 ~~these areas.~~

798 ~~4.32.2 The institution shall maintain an inventory of all internal or third-party digital or~~
799 ~~electronic resources that store, process, or transmit personally identifiable information.~~

800 ~~4.33 Remote Access~~

801 ~~4.33.1 Users with remote access privileges to any of the University's networks inside a firewall~~
802 ~~must connect through an approved connection method such as a secure VPN.~~

803 ~~4.33.2 Users with remote access privileges to the University's digital or electronic resources must~~
804 ~~ensure that all devices being used are given the same security considerations as outlined in the IT~~
805 ~~security annual training. Specific security questions should be directed to the IT Security~~
806 ~~Department.~~

807 ~~4.34 Network Security~~

808 ~~4.34.1 Access to both internal and external networked services shall be controlled and protected~~
809 ~~commensurate with the assessed level of risk. User, information system and digital or electronic~~

810 access to networks and network services shall not compromise the security of the network
811 services by ensuring the following:

812 ~~4.34.1.1~~ Appropriate controls are in place between the University's network, networks owned by
813 other organizations, and public networks; and

814 ~~4.34.1.2~~ Appropriate authentication mechanisms are applied for users, information systems and
815 digital or electronic resources.

816 **4.35 Log Management and Monitoring**

817 ~~4.35.1~~ The appropriate IT personnel, in coordination with the ISO, shall configure university
818 information systems and digital or electronic resources to record and monitor information
819 security incidents, events and weaknesses. They shall regularly review and analyze audit logs for
820 indications of inappropriate or unusual activity.

821 **4.36 Information System Media Handling**

822 ~~4.36.1~~ University information system media shall be inventoried, controlled, and physically
823 protected commensurate with the assessed level of risk and the *Data Classification and*
824 *Encryption Guideline* to prevent interruption to business activities or unauthorized disclosure,
825 modification, removal, or destruction of technology assets. Appropriate operating procedures
826 shall be established to protect information system media, input/output data, and system
827 documentation from unauthorized disclosure, modification, removal, and destruction.

828 ~~4.36.2~~ The appropriate university system administration or security group shall restrict access to
829 information system media to authorized individuals.

830 ~~4.36.3~~ All institutionally owned computing devices, including removable storage devices, shall
831 have industry standard encryption that renders the storage media of those devices reasonably
832 unrecoverable by a third party or shall implement other reasonable controls.

833 ~~4.36.4~~ The University shall physically control and securely store information system media on-
834 site within controlled areas where appropriate and ensure any authorized off-site storage is, at
835 minimum, secured at the same level as the on-site area.

836 ~~4.36.5~~ The University shall protect and control information system media during transport
837 outside of controlled areas and shall restrict the activities associated with transport of such media
838 to authorized personnel.

839 ~~4.36.6~~ The University shall sanitize or destroy information system media containing confidential
840 data prior to disposal or release for reuse in accordance with National Institute of Standards and
841 Technology guidance.

842 ~~4.37 Future Technology Needs Assessment~~

843 ~~4.37.1 IT shall ensure current and future needs for availability, performance, and capacity with~~
844 ~~cost-effective service provision. This includes assessment of current capabilities, future needs~~
845 ~~based on organization requirements, and implementation of actions to meet the new~~
846 ~~requirements. The goal is to ensure service availability, efficient management of resources, and~~
847 ~~optimization of system performance through effective capacity planning.~~

848 ~~4.38 Information Security Awareness and Training~~

849 ~~4.38.1 All university employees and other affiliates are required to complete appropriate security~~
850 ~~training relevant to their roles and responsibilities before gaining access to systems, records, and~~
851 ~~information resources and shall renew that training annually. If university employees and other~~
852 ~~affiliates do not fulfill these training requirements, their access may be subject to revocation.~~

853 ~~4.38.2 The appropriate university information systems and security groups shall stay up-to-date~~
854 ~~with the latest recommended security practices, techniques, and technologies, and the latest~~
855 ~~security-related information including threats, vulnerabilities, and incidents.~~

856 ~~4.39 Internal Audit Assessment~~

857 ~~4.39.1 Internal Audit shall audit systems used for university business to ensure compliance with~~
858 ~~this policy and industry security standards.~~

859 ~~4.40 Violations~~

860 ~~4.40.1 Incidents of actual or suspected non-compliance with this policy or associated regulations~~
861 ~~must be reported to the Information Security Office, whose administrators will work with the~~
862 ~~appropriate authorities to resolve the issue.~~

863 ~~4.40.2 The University reserves the right to revoke access to any resource for any user who~~
864 ~~violates this policy or associated regulations or for any other business reasons in conformance~~
865 ~~with applicable policies. Violations of this policy or associated regulations may result in other~~
866 ~~disciplinary action in accordance with pertinent university policies.~~

867 ~~4.41 Security Standards~~

868 ~~4.41.1 Those responsible for devices connected to the UVU network must ensure that key~~
869 ~~security vulnerabilities are eliminated from these devices.~~

870 ~~4.41.2 Dx shall maintain and communicate to device owners a current list of key vulnerabilities~~
871 ~~and steps required to mitigate the vulnerabilities. Device owners are responsible for addressing~~
872 ~~those vulnerabilities promptly with IT assistance as needed.~~

873 **4.42 Enforcement**

874 ~~4.42.1 In cases where university network resources and privileges are threatened by improperly~~
875 ~~maintained computing devices, OIT may eliminate the threat, working with the relevant device~~
876 ~~owner where possible. This may include denial of access to campus resources.~~

877 **4.43 Exceptions to Policy**

878 ~~4.43.1 Exceptions to this policy must be justified, approved, and reviewed annually as outlined~~
879 ~~in the procedures. Requests for exceptions to this policy shall be made in writing to the Chief~~
880 ~~Information Officer. Exception may be granted if the benefits to the University far outweigh the~~
881 ~~risks of the vulnerable device, as judged by the Chief Information Officer.~~

882 **4.44 Review and Maintenance of Policy**

883 ~~4.44.1 The IT Oversight Committee, including the Chief Information Officer, shall review this~~
884 ~~policy at least annually and evaluate changes in law and technology that may impact the~~
885 ~~University. The committee shall invite representatives of UVUSA, PACE, General Counsel, and~~
886 ~~Faculty Senate to participate.~~

5.0 PROCEDURES

887 **5.5 Physical Security of Enterprise Hardware**

888 ~~5.5.1 Any department that assumes responsibility for administrative data must ensure that the~~
889 ~~computing systems housing the data are physically secure. Areas to address include the~~
890 ~~following:~~

891 ~~1) The equipment shall be protected from excessive heat, cold, humidity, and dryness. Alarms~~
892 ~~shall exist to warn of thresholds being exceeded; and~~

893 ~~2) The equipment shall be protected against electrical interruptions, voltage spikes, and surges;~~
894 ~~and~~

895 ~~3) The equipment shall be protected with smoke detectors, fire extinguishers, and air-tight~~
896 ~~computer rooms for containment of fire suppression gas, air filters, and water sensors. Alarms~~
897 ~~tied to the University and city police departments shall be installed; and~~

898 ~~4) The equipment shall be properly locked up with no vulnerabilities from drop ceilings, raised~~
899 ~~floors, or ventilation ducts. A log of accesses by personnel shall be kept; and~~

900 ~~5) Backups shall be moved offsite, and a fireproof vault shall be used if backups remain onsite.~~
901 ~~The offsite storage location shall be securely maintained and managed in a manner appropriate~~
902 ~~for the storage of university data; and~~

UTAH VALLEY UNIVERSITY

Policies and Procedures

903 ~~6) The history of theft and vandalism in the buildings of the immediate vicinity shall be~~
904 ~~considered, and appropriate measures shall be taken to counteract the risks; and~~

905 ~~7) A disaster recovery plan shall exist, and drills shall be conducted on a regular basis. Offsite~~
906 ~~documentation shall exist, and key personnel shall be cross trained to handle an emergency.~~

907 ~~5.5.2 Owners of devices shall install and run campus approved anti-virus software on these~~
908 ~~devices and apply updates from the software vendor as they become available.~~

909 ~~5.5.3 Owners of devices shall apply security related updates to the operating system running on~~
910 ~~their devices as these updates become available from operating system vendors.~~

911 ~~5.5.4 Owners of devices shall switch off unneeded services or use a firewall to eliminate the risk~~
912 ~~of these being exploited.~~

913 **5.6 Incident Management**

914 ~~5.6.1 All suspected or actual security breaches of university or departmental systems must be~~
915 ~~reported immediately to the University's Chief Information Security Office (CISO). (Reports~~
916 ~~may be emailed to SECURITY@UVU.EDU.) The incident must also be reported to the~~
917 ~~appropriate data steward and data custodian.~~

918 ~~5.6.2 If the compromised system contains PII or PSI as outlined in UVU Policy 445~~
919 ~~*Institutional Data Management and Access*, IT personnel or the appropriate data owner must~~
920 ~~report the incident to the Office of General Counsel. Additional technical, forensic, and other~~
921 ~~support may be sought from outside the campus community.~~

922 ~~5.6.3 If PII, PSI, secured data, or any other information that must be safeguarded against~~
923 ~~unauthorized access has been accessed or compromised by unauthorized persons or~~
924 ~~organizations, IT personnel or the appropriate data owner must report the incident immediately~~
925 ~~to the ISO (SECURITY@UVU.EDU) and cooperate with their dean, department head, or~~
926 ~~supervisor; the Incident Response Team; their respective vice president; and the Office of~~
927 ~~General Counsel to assess the level of threat or liability posed to the University and to those~~
928 ~~whose PSI was accessed. In accordance with applicable laws, the University shall notify the~~
929 ~~individuals whose PSI was accessed or compromised, providing them with instructions regarding~~
930 ~~measures to be taken to protect themselves from identity theft.~~

931 **5.7 Security Management of PSI**

932 ~~5.7.1 PII, PSI, secured data, and any other information that must be safeguarded against~~
933 ~~unauthorized access should be identified and protected. Anyone with access to data resources~~
934 ~~who is uncertain whether or not it contains PSI or secured data must seek direction from the Data~~
935 ~~Governance Council, the appropriate data steward or data custodian, the campus HIPAA Privacy~~
936 ~~Officer, or the University's Chief Information Security Officer (CISO).~~

UTAH VALLEY UNIVERSITY
Policies and Procedures

937 ~~5.7.2 Any individual who stores export controlled patentable research shall have and follow a~~
938 ~~CISO approved security plan.~~

939 ~~5.7.3 Security procedures must be approved by the CISO for any devices or systems that do not~~
940 ~~necessarily store, process, or transmit PSI, if access to such resources may cause a breach of~~
941 ~~security.~~

942 ~~5.7.4 Individuals are responsible for ensuring that all electronic information, hard copy~~
943 ~~information, and hardware devices in their possession are physically protected in accordance~~
944 ~~with the record classification level as either private or protected data. For more information,~~
945 ~~(refer to UVU Policy 133 *Compliance with Government Records Access and Management Act*~~
946 ~~and the *University Data Classification and Encryption Guidelines*).~~

947 ~~5.8-~~

948 **5.9 Control Activities**

949 ~~5.9.1 Authorized Dx personnel shall perform the following processes regularly as control~~
950 ~~activities:~~

951 ~~1) Assess availability, performance, and capacity of services and resources to ensure that cost-~~
952 ~~effective capacity and performance are available; and~~

953 ~~2) Identify important services to the organization, map services and resources to organization~~
954 ~~processes, and identify key organization dependencies; and~~

955 ~~3) Plan and prioritize availability, performance, and capacity implications of changing~~
956 ~~organization needs and service requirements; and~~

957 ~~4) Continually monitor, measure, analyze, and review availability, performance, and capacity;~~
958 ~~and~~

959 ~~5) Investigate and address availability, performance, and capacity issues through monitoring and~~
960 ~~investigating.~~

UTAH VALLEY UNIVERSITY

Policies and Procedures

POLICY 447 EXECUTIVE SUMMARY

Policy Number and Title: 447 Information Security

Date:	April 29, 2024
Sponsor:	Christina Baum
Steward(s):	Brett McKeachnie
Policy Process:	Regular
Policy Action:	Revision
Policy Office Editor:	Cara O’Sullivan
Embedded Attorney:	James Duncan

Issues/Concerns (including fiscal, legal, and compliance impact):

We decided it was appropriate to move language addressing Private Sensitive Information to this policy. This policy update does not make any significant changes to the rest of the policy or its purpose nor intent.

Suggested Changes:

Revisions are inserting relevant Private Sensitive Information material, the definition, and procedures to be contained in this policy so that Policy 449 Private Sensitive Information can be deleted.

Requested Approval from President’s Council: Entrance to Stage 1

Proposed Drafting Committee: Joe Belnap, LeRoy Brown, Brett McKeachnie, others TBD

Target Date for Stage 1 Draft to Enter Stage 2: 8/19/2024

Target Date for Board of Trustees Review: 10/31/2024
